

Comparison Pre/Post Written Assessment Report

The Pre/Post-Written Assessment Comparison Report is a powerful tool for teachers and school administrators to identify and correct the factors that impact student learning and performance. The impact of this comparison can be meaningful for curriculum development and/or program improvement. This special report is generated when an individual has taken both a pre-and post-assessment. Please review the sample report and locate the percent of change and/or gain.

Participant Score Report Carpentry

Participant Name: Student B
Participant ID: 100000002A

Level: 12th Grade
Site: NOCTI Test Site

State: Michigan
Date: 1/10/2005

Written Test	Pre-Test	Post-Test	% Change	Group	Site	State	Nation
Hand Tools	54.6	90.9	36.3	81.8		66.1	69.0
Power Tools	83.3	91.7	8.4	81.7		68.7	70.5
Blueprints & Specifications	20.0	60.0	40.0	76.0		64.8	66.7
Building Materials & Fasteners	71.4	85.7	14.3	80.0		63.8	66.1
Measuring & Layout Operations	54.6	63.6	9.0	69.1		59.7	62.2
Foundation, Forms & Concrete	76.9	84.6	7.7	75.4		51.9	53.2

Exterior Finish	41.7	83.3	41.6	85.0		55.0	58.2
Interior Finish	75.0	100.0	25.0	90.0		62.5	66.6
Basic Mathematics	50.0	92.9	42.9	80.0		66.6	66.6
Interior System Installation	50.0	75.0	25.0	67.5		54.0	56.6
Total	55.0	81.4	26.4	78.0		61.1	63.4

NOTE: All values represent % scored correct

A Section A lists the subparts of the assessment

B The individual's scores are displayed in Section B. Since the test taker has taken a pre-assessment, the pre-assessment scores are shown next to the post-assessment scores, and the percentage of change between the pre-and post-assessment scores is also provided

C Comparative data is displayed on the individual report as well. This allows the test taker to compare his/her post-assessment scores to the averages of the group, site, state and nation.
