

Pre-Assessment Administration

Pre-assessment orders must be placed by November 1 for both written and online administration. As of November 30th of the academic year, answer sheets for pre-assessments must be received at NOCTI and participation codes for online administration will be set to expire. This ensures that comparisons between pre-and post-assessment will be considered on an individual site basis:

Secondary

- When pre-assessment administration takes place during the junior year and post-assessment takes place at the completion of the senior year
- When pre- and post assessment administration will take place outside of a one-year window
- When the program begins at a time other than the traditional fall term

Please note....

Secondary schools must provide an explanation with their order from at the time an order is placed with NOCTI if pre-assessment administration is scheduled outside of the policy guidelines. NOCTI reserves the right to refuse pre-assessment administration that falls outside of the pre-defined testing window.

Post-Secondary

- When a program begins at a time other than the traditional fall term

It is imperative to use the same test code and version of the assessment for administration of pre- and post assessments. Comparison data cannot be provided if different versions or revised editions of an assessment are administered.
