

Green Production Certification

General Assessment Information

Blueprint Contents

General Assessment Information
Written Assessment Information

Test Type: This certification assessment is offered in partnership with the Manufacturing Skill Standards Council (MSSC). The Green Production Certification Program applies to all frontline production technicians in all sectors of manufacturing. The eligible population for this certificate expands far beyond just technicians in green product sites (e.g., wind, solar equipment producers).

Why Choose MSSC Certification Programs?

MSSC's certification programs are designed to equip students and employees with the core skills and competencies needed to be stand-out candidates to future employers. Employers can be confident in the industry-relevant knowledge and abilities of their employees who have passed the MSSC certification exams.

Green Production Certification

Green Production is defined as workplace activities across all industries within the manufacturing sector that require the use of equipment, technologies, and processes that will improve the environmental performance of manufacturing companies.

This module is based on industry-defined, nationally validated national skill standards and includes a comprehensive set of system tools: curriculum, textbook, e-learning, instructor certification training, a national registry, assessments, and credentialing.
